

This is a sample table of contents from the InstallAnywhere 8 Training Manual. To purchase a copy of this training manual, visit <http://www.macrovision.com/services/education/publications>.

Course Introduction	9
An Introduction to Installation Issues	10
Multiplatform Installation	10
Chapter 1: Introduction to InstallAnywhere	13
What is InstallAnywhere?	14
Requirements	14
Authoring Environment	14
Target Environment	15
Editions	16
Enterprise Edition	16
Standard Edition	16
Chapter 2: The InstallAnywhere End-User Experience	17
The End-User Experience	18
The Client-Side Installer Experience	18
The Server-Side Installer Experience	23
Chapter 3: The InstallAnywhere Developer Experience	29
The InstallAnywhere Wizard	30
Building Your First Installer	30
Chapter 4: Key Concepts in InstallAnywhere	33
Authoring Environments	34
Installer Types	34
Web	34
CD	34
Merge Modules	34
Templates	34
Installer Modes	34
Install Sets, Features, and Components	35
Installer Interface GUI	35
Localization	35
Look and Feel	35
Actions	36
General Actions	36
Panel Actions	36
Console Actions	36
Plug-in Actions	37
Rules	37
Uninstaller	37
LaunchAnywhere	37
InstallAnywhere Variables	37
Magic Folders	38
Magic Folder Examples	38
SpeedFolders	39
Strict VM Selection	40
Project File	41
Manifest Files	41
InstallAnywhere Collaboration and DIMs	41
FLEXnet Connect	42

Chapter 5: Basic Installer Development Strategies	43
Installation Planning	44
Installation Goals	44
InstallAnywhere Installation Planning Worksheet	45
Target Platforms	45
Installer Target	45
Deployment Media	45
Application Type	45
Java Specific Options	45
Installation Needs	46
List Configurations that Must Be Done on the Target Platform	46
What Information Must Be Collected from the End User?	46
Team Development Options	47
Uninstall Options	47
Chapter 6: An Introduction to the Advanced Designer	49
Exercise 6.1 Building an Installer with the Advanced Designer	50
Defining Installer Projects and the Product Registry	55
Product Registry	55
Installer Identification and Version	55
File Settings—Timestamps and Overwrite Behavior	55
Platforms	57
Locales	57
Rules Before the Pre-Install Task	57
Creating Debug Output	57
Virtual Machines	57
Optional Installer Arguments	58
Java	58
Quick Quiz	59
Chapter 7: Build Options	61
Generic and Custom UNIX Builds	62
VM Packs	62
Distribution	62
Web Installers	62
CD-ROM/DVD Installers	62
Merge Modules and Templates	64
Build Log	64
Chapter 8: Basic Installer Customization	65
Customizing Your InstallAnywhere Installer Look and Feel	66
Exercise 8.1 Exploring Look and Feel	66
Installer UI Modes	66
Splash Screens	66
Background Images	67
GUI Panel Additions	67
Frame UI Settings	67
Billboards	67
Help	67
Exploring the Installer UI Tasks	67
Introducing Conditional Logic	70
Exercise 8.2 Using Installer Rules	71
Exercise 8.3 Using Rules to Control Visual Elements	72
Exercise 8.4 Managing Installer Flow Based on End-User Input	73

Step One: Retrieving End-User Input	74
Step Two: Applying the End User's Choice	75
Quick Quiz	77
Chapter 9: Installer Organization	79
Install Sets, Features, and Components	80
Install Sets	80
Features	80
Components	81
The Organization Task	83
Organizing Features and Components	84
Best Practices for Components	84
Best Practices for Features	84
Best Practices for Install Sets	85
Exercise 9.1 Using InstallAnywhere's Basic Installer Organization	85
Adding Components	87
Assigning Files to Components	87
Removing Empty Components	87
Integrating Components Already Installed on Target System	87
Adding Features	87
Quick Quiz	89
Chapter 10: Introduction to Advanced Actions and Panel Actions	91
Actions	92
Action Availability by Task	92
General Actions	92
Action Groups	92
Pre-Install/Uninstall and Post-Install/Uninstall Actions	93
Exercise 10.1 Using Panels in Pre-Install	93
Exercise 10.2 Using Install Task Actions	94
Quick Quiz	97
List of Actions	99
Install Actions	99
General Actions	100
Panel Actions	102
Console Actions	104
Common Properties	106
Panel Action Settings	106
Additional Action Information	107
Chapter 11: Managing Installation Locations with Magic Folders	109
Magic Folders and InstallAnywhere Variables	110
Exercise 11.1 Magic Folders	111
InstallAnywhere Provided Magic Folders	112
Chapter 12: Applying Basic and Intermediate Development Concepts	115
Concept Review	116
Debugging InstallAnywhere Installers	117
During Installer Development	117
Post Development	117
Chapter 13: Advanced Installer Concepts	121
Console Installers	122

Exercise 13.1 Building a Console Enabled Installer (the return of OfficeSuite)	123
Silent Installers	123
Exercise 13.2 Building a Silent Mode installer	124
Chapter 14: Uninstaller Issues	127
About Uninstaller	128
Feature Uninstall	128
Uninstaller for Multiple Products	128
Chapter 15: Source and Resource Management in InstallAnywhere	129
How Source Paths Work	130
Adding Source Paths	130
Updating the Location of Files and Resources	131
Managing Source Files	131
The Resource Manager	131
Adding Source Path Management Capability to your Installer Project	131
Exercise 15.1 Creating Source Paths	133
Managing Resources in the InstallAnywhere Project File	133
Quick Quiz	135
Chapter 16: Advanced Interface Options	137
Installer Panel Additions	138
Panel Images	138
Panel Labels	138
Advanced Installer Interface Actions	138
Using Jump Actions and Logic	139
Exercise 16.1 Creating Installer Logic Using Jump Labels and Actions	139
Quick Quiz	141
Chapter 17: Advanced Organizational Concepts	143
Integrating Find Component in Registry Action	144
Merge Modules and Templates	144
Merge Modules	144
Templates	146
Merge Module Types	146
Creating Merge Modules and Templates	147
Adding Advertised Variables	148
Adding Merge Modules	148
Importing a Design Time Merge Module	148
Merge Module Customizer	149
Exercise 17.1 Creating Merge Modules	149
Quick Quiz	151
Chapter 18: Integrating InstallAnywhere with Automated Build Environments	153
Integrating InstallAnywhere with Automated Build Environments	154
InstallAnywhere Command Line Build Facility	154
Build Tools	154
Exit Codes	155
Examples	156
Digitally Signed Installers	156
ANT Build Integration	157
Task Name and Class	157
Parameters	157

Chapter 19: Custom Code	161
Writing Custom Code	162
Custom Code Actions	162
Custom Code Panels	165
Custom Code Consoles	167
Custom Code Rules	169
Quick Quiz	173
Chapter 20: Developing and Using Custom Code Actions	175
Custom Code and InstallAnywhere Variables	176
Accessing InstallAnywhere Variables via Custom Code	176
Executing External Scripts and Executables via Custom Code Action	177
Using InstallAnywhere Custom Code Actions in Uninstall	179
Debugging Custom Code	179
Best Practices for Custom Code Development	179
Advanced Action Methods	179
How to Write Custom Errors in the Installation Log	180
Summary	181
Custom Code Development Exercises	181
Exercise 20.1 Create a Custom Code Action	181
Exercise 20.2 Create a Custom Code Panel	181
Exercise 20.3 Create a Custom Code Console Action	181
Exercise 20.4 Create a Custom Code Rule	182
How to Package and Execute Custom Code with an Installer	182
Plug-Ins	182
Packaging Custom Code as a Plug-in	183
Chapter 21: Localizing and Internationalizing InstallAnywhere Installers	185
Dynamic and Static Text	186
Localization and the Internationalized Designer	186
Specific Localization Concerns	187
Localizing Resources	187
Localizing Custom Installer Labels	187
Localizing Custom Code	187
Best Practices for Localizing	188
Changing Localized Text	188
Modifying Localized Text	188
Changing Default Translations Provided in Language Packs	189
Language Codes	189
Localizable Elements	189
Localizing Items in the Installer	190
Appendix A. Standard IA Variables	193
Appendix B. Provided Magic Folders	199
Appendix C. Actions	201
Install Actions	201
General Actions	202
Panel Actions	204
Console Actions	206
Common Properties	207
Panel Action Settings	207

Additional Action Information	208
Appendix D. Build Tools	211
Appendix E. Exit Codes	213
Appendix F. Parameters	215
Appendix G. Language Codes	217
Appendix H. Localizable Elements	219
Appendix I. LAX Properties	221
Appendix J. Installation Planning Worksheet	225
Target Platforms	225
Installer Target	225
Deployment Media	225
Application Type	225
Java Specific Options	225
Installation Needs	226
List Configurations that Must Be Done on the Target Platform	226
What Information Must Be Collected from the End User?	226
Team Development Options	227
Uninstall Options	227
Index	229
