

This Table of Contents is from the training manual, “Learning InstallShield 11.5® Express Edition.” For information about purchasing this training manual and to learn about other Macrovision training materials, please visit www.macrovision.com/services/education/.

CONTENTS

1	Introduction to Installations and InstallShield Express Edition	11
	What Is an Installation?	11
	Typical Installation Tasks	11
	Transferring Files.	11
	Displaying the User Interface	12
	Creating Shortcuts	12
	Registering File Associations	12
	Registering COM, COM+, and DCOM Files	12
	Registering Products for Uninstallation	12
	What is Windows Installer?	13
	The Windows Installer Database	13
	Windows Installer APIs	14
	Windows Installer Properties	14
	Benefits of Using Windows Installer.	15
	Self-Repair	15
	Feature Advertisement.	15
	Componentized Installation.	16
	Rollback	16
	Single File Distribution	16
	Merge Modules	16
	File Versioning	17
	User-Accessible Information	17
	Clean Uninstallation	17
	COM, COM+, and DCOM File Registration	17
	Ease of Administration	18
	“Designed for Microsoft Windows” Logo Requirements	18

Using InstallShield 11.5 Express Edition	19
Getting Help with Your Projects	21
Online Resources	21
Tutorials	21
Technical Support	22
Express System Requirements	22
How To Use this Manual	22
Following the Tutorial.	22
Downloading the Sample Project Files.	23
Icons Used in this Manual.	23
2 Creating an Installation Project	25
Windows Installer Terminology	25
Products	26
Features.	26
Creating a Project.	26
Using the Project Assistant	28
Accessing and Exiting the Project Assistant.	29
Navigating in the Project Assistant	29
Help Within the Project Assistant	29
More Options	29
Other Places	30
Help Links.	30
Defining Your Project in the Project Assistant	30
Specifying Application Information.	30
Setting Installation Requirements	34
Customizing Your Installation's Architecture.	36
Adding Files to Your Project	39
Creating Shortcuts	41
Configuring Registry Data.	43
Selecting Dialogs with the Installation Interview	45
Building Your Installation	47
Running the ITA Installation to Test Procedures	48
3 Organizing Your Installation	51
The Installation Designer Environment.	51
Displaying Toolbars	52
View Bar and View List.	53
Organizing Your Setup.	53
Setting General Project Information.	53

Product Properties	54
Summary Information Stream	57
Working with Features	60
Creating Features and Subfeatures	61
Reordering Features	62
Referencing DIM Files	63
Adding a DIM Reference	64
Working with Setup Types	64
Defining and Including Setup Types	65
Renaming and Reordering Setup Types	65
Upgrade Paths and Update Service	66
Creating Trialware	66
Summary	66
4 Specifying Application Data	67
Working in the Files View	67
Adding Files to an Installation Project	68
Specifying Destination Directories	69
Creating Subdirectories	69
Hard-Coding Destination Folders	70
Understanding Path Variables	70
Portability	70
Viewing File Attributes	71
Overriding System Attributes	72
Specifying COM & .NET Settings	72
Specifying Advanced File Settings	73
Using Dynamic File Links	75
Finding Files or Folders	77
Understanding Redistributables	77
Using Redistributables	78
Setup Prerequisites	78
Configurable Merge Modules	79
Dynamically Updating the Redistributable Gallery	80
Changing the Merge Modules Location	81
Identifying Dependencies	81
Mobile Device Installations	82
5 Configuring the Target System	83
Working with Shortcuts	83

Specifying Shortcut Settings	85
Creating Internet Shortcuts	86
Working with Registry Data	87
Adding Registry Data	87
Creating Registry Keys	88
Creating Registry Values	89
Dragging and Dropping Registry Data	90
Importing a Registry File	90
Application Paths	91
Creating an Application Path	91
Installing ODBC Resources	92
Making Changes to INI Files	92
Creating File Extensions	94
Using Arguments	97
Specifying a ProgID	98
Working with Environment Variables	98
Installing Special Types of Files	100
Installing Fonts	101
Installing .NET Applications	101
.NET File Properties	102
Installing an Assembly to the Global Assembly Cache	102
Internet Information Services	103
Component Services	104
6 Customizing the User Interface	105
Working in the Dialogs View	105
Displaying Dialog Boxes	106
Modifying Dialog Box Appearance	107
Global Dialog Graphic Changes	107
Customizing the Customer Information Dialog	109
Using Billboards	111
Adding Billboards	112
Ordering Your Billboards	112
Working with the String Table	112
Editing String Table Entries	113
Localizing Your Installation	114
Exporting and Importing String Tables	114

7	Defining Installation Requirements and Actions	117
	Setting Installation Conditions	117
	Specifying Hardware Requirements	118
	Specifying Software Requirements	119
	Creating Launch Conditions with the System Search Wizard	119
	Setting Feature Conditions	122
	Setting Custom Action Conditions	123
	Working with Custom Actions	123
	Custom Action Categories	124
	Custom Action Types	125
	Executable Custom Actions	125
	VBScript Custom Actions	127
	DLL Custom Actions	128
	Using Setup Files	131
8	Building Releases	133
	Using the Build Your Release View	133
	Specifying Release Settings	135
	Build Progress	137
	Files Created when You Build a Release	137
	Rebuilding Releases	138
	Testing Releases	139
	Distributing Your Release	139
	Creating a Web Build	139
	Providing One-Click Installations	143
	Building Releases from the Command Line	145
	Troubleshooting with Error and Warning Codes	146
	The Windows Installer Database and Releases	147
	Using Microsoft Build Engine	147
	Building a Release from the Command Line	147
9	Deploying an Installation	149
	Running an Installation Program	149
	Default Installation Behavior	149
	Welcoming the End User	150
	Collecting Customer Information	151
	Presenting Setup Type Options	152
	Allowing the End User to Change the Destination Directory	154

Displaying Disk Space Requirements	155
Displaying Subfeatures	156
Presenting the Settings Summary	156
Showing Installation Progress	157
Showing Installation Success	157
Running a Maintenance Installation	158
Using Favor Local vs. Favor Source	160
Using Favor Advertise vs. Disallow Advertise	161
Distributing Your Release	161
Distributing Packages from CD-ROM or DVD-ROM	162
Enabling Autorun for a CD-ROM or DVD-ROM Installation	163
Using Advertisement	163
Uninstalling Applications	164
MsiExec.exe and Setup.exe	165
Passing Command-Line Parameters	165
Setting Public Properties at the Command Line	165
Silent Installations	166
Logging Your Installation	167
Reboots	168
Per-User and Per-Machine Installations	168
10 Implementing Updates and Patches	171
Windows Installer Patching	171
Updates Available in InstallShield Express Edition	172
Major Upgrades vs. Patches	173
Creating a Major Upgrade	173
Using the Upgrade Paths View	174
QuickPatch Projects	175
Using the InstallShield Update Service to Provide Software Updates	178
A Using Trialware	179
How Trialware Licenses Work	179
Types of Trialware	180
Try and Buy/Product Activation	180
Issues with .NET, Java, PowerBuilder, or Other Interpretive Languages	181
Creating a Try and Buy Version of Your Product	181
Creating an InstallShield Activation Service Account	181

Configuring Trialware View Settings	181
The General Tab	182
The Advanced Tab	183
Configuring Publisher Web Site Settings	184
Managing Your Products	185
Managing Your Licenses	186
Managing Serial Numbers	187
Building a Trialware Release	189
Testing a Try and Buy Release	190
The Try and Buy/Product Activation Experience	190
Files Installed with a Trialware Product	193
Uninstallation of Try and Buy Trialware	193
