Initial Deployment317
Update Deployment320
Summary.....	.325
10 Additional Topics	327
Transform Projects327
Creating a Transform328
Creating a Response Transform331
Applying a Transform332
Advanced Topic: Multi-instance Installations333
Direct MSI Editing335
Windows Installer Automation Interface336
SQL Syntax337
Using SQL Queries.....	.339
A Course Exercises	341
Chapter 2: Creating a Project342
2.1 Using the Project Assistant.....	.342
2.2 Using the Installation Designer.....	.343
Chapter 3: Files344
3.1 Scanning for Dependencies.....	.344
3.2 Creating a Shortcut.....	.344
3.3 Creating a Dynamic File Link345
Chapter 4: Building a Release.....	.346
4.1 Using the Release Wizard.....	.346
4.2 Building from the Command Line347
Chapter 5: Deployment347
5.1 Running Setup from the Command Line347
5.2 Uninstalling from the Command Line.....	.348
5.3 Setting Property Values at the Command Line348
5.4 Silent Installations.....	.348
5.5 Generating a Log File.....	.348
Chapter 6: Configuring the Target System349
6.1 Adding Registry Data349
6.2 Modifying INI File350
6.3 Modifying XML File350
6.4 Modifying Text File351
6.5 Adding a Per-Application Path351
6.6 Registering a File Association352
6.7 Registering a COM Server352
6.8 Installing and Configuring an NT Service.....	.353
6.9 Creating and Using a Merge Module.....	.354

Chapter 7: Conditions and Actions355

- 7.1 Working with Launch Conditions355
- 7.2 Component Conditions356
- 7.3 Launching an Installed File.356
- 7.4 Using the RemoveFile Table.357

Chapter 8: User Interface357

- 8.1 Inserting a Dialog Box357
- 8.2 Modifying a Dialog Box.358
